

## Our Book Department

Literature is replete with references to the horse. From children's stories to great works of fiction, historical texts and how-to manuals, poetry, biographies—in virtually every genre some shelf space must be allotted for tales of the horse and related sports.

Our book department has amassed an impressive library of old and rare publications encompassing the spectrum of horse-related subjects. No discipline is overlooked: foxhunting, racing, polo, dressage, eventing are all covered. Training manuals are available as are archival records. There's an extensive list of children's titles and fiction suitable for a wide audience. Some publications bear a printing date as far back as the early 1800s.

Of more current vintage, you'll also find an array of books by today's leading authors on horse sport topics. Thrilling mysteries (murder in the hunt field!), autobiographies by legendary figures, and photo collections to embellish any coffee table are all available.

Whether for your own library or as thoughtful gifts, you're sure to find something suitable on our shelves.
