HOW TO TIE A HORSE COUNTRY® HUNTING STOCK

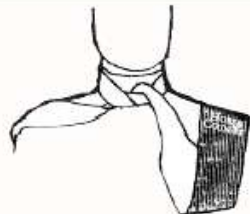

1 The normal stock has a buttonhole in the front with a slot in the band.

2 Pass the collar part round the neck from the front to the back and fasten the front buttonhole to the shirt stud at the front. Push the opposite end through the stock slot to bring both ends on to the chest.

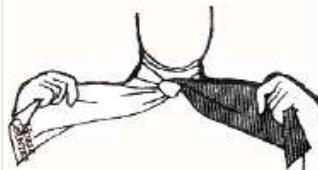

3 Make a single right-over-left knot close into the neck so that one end will be over the right shoulder and the other on the chest. With a safety pin, secure the knot to avoid movement.

4 Place the end on the chest over the left shoulder folding it upwards and over.

5 Then bring down the other end over and through the fold at the right.

6 Now pull the ends upwards.

7 Manipulate both sides of the stock so that the head of the second knot shows at the base of the triangle formed and secure with a stock pin through both ends of the stock and on to the shirt.

8 The tie illustrated here is an alternative. To achieve this effect, pull the ends tighter than indicated in Diagram 6 then fold down over the knot and smooth the stock out.
